Warlords2 and windows vista

Posted by caveman_1 - 25 Apr 2011 14:51

How do I get warlords 2 to work with windows vista?

http://www.dosbox.com/

DOSBox works better for Warlords 1 than Warlords 2. (At least for me the colors seem messed up in Warlords 2 -- maybe there's some setting to fix it.)

Strange, Doxbos works perfectly for me.

Warlords 2 is only a 256 color game so there won't be great graphics in it. What kind of issues are you seeing?

Warlords 2 is only a 256 color game so there won't be great graphics in it.

Hey, 16 colors is more than enough for a TBS game. 4 would be kind of pushing it though.

What kind of issues are you seeing?

It looked kind of like the palette was filled with random numbers -- you could make out shapes but all of the colors were completely wonky. However, I just started it up again (didn't change anything) and now it looks perfect. So I don't know what happened.

How do I get warlords 2 to work with windows vista?

In addition to using DOSBox, make sure you run the warlords 2 INSTALL.EXE so you get sound.
