Warlords Classic Army sets v1.0

What this is:

Original army graphics from Classic Warlords II and Warlords I

The army set is complete, hence you can play Warlords Deluxe maps with the original Army set from Warlords 2 Classic!

The Warlord2ORIGINALArmy.zip contains files to be used as an artistic resource from Warlords I and II for scenario design

Or can be used as is to replace default units or add another army set.

Get it HERE

www.mediafire.com/file/csoaobmnbi20a8e/W...RIGINALArmy.zip/file

WHY did you create this?

Artists in their scenario design may wish to use the sprites in their work and those not satisfied with the default Army sets of the Warlords Deluxe release can use these in their place.

The ORIGINAL graphics from DOS Warlords I are hard to extract without specialized software. It is in .gif format though will copy and past into a .pcx file just fine

CLASSIC Warlords II Army sets in .pcx format were updated in Warlords II Deluxe (and likely did not ship with the GOG release).

Warlords II Classic Cities are found in the CITY folder in ILLURIA.

Warlords II Deluxe for the PC updated the default Army sets into a more "realistic" 3d look. However I think something was lost as some of the the updated figures do not show up as well on the map as the earlier figures did.

==========
