Having problems running warlords 3 DLR on win98

Posted by bfallon - 03 Jun 2013 06:31

I've been playing for quite a while and recently had to rebuild my win98 machine, and ended up with a fresh win98 install. When trying to run the game now with a new hard drive, the start screen comes up, and when I launch single player it ends up erroring out with a "Couldn't initialize the multimedia resources." dialog. Any one have any ideas? Unsurprisingly, google didn't return a lot of results when I tried searching for it. Thanks!

Does your Win98 machine have a sound card and a CD-Rom? DLR is expecting to find both of those things.

There is a no-CD patch here in the downloads section that alleviates the need for a CD-Rom.
