Warlords 3: Darklords Rising Scaling Question

Posted by iBazly - 13 Dec 2013 12:02

Hey there everyone!

I am trying to run Warlords 3 on my computer, and everything seems to be going fine, except that no matter WHAT I do, it seems to constantly be scaling (stretching the game to my screen's resolution). I am running Windows 7, and my graphics card is an NVIDIA GeForce GTX 560. I have set the shortcut to the game to disable scaling, and I have scaling disables on my video card itself.

Any suggestions?

I run Darklords on virtual machine (virtual box). It runs in a window.
