DLR o	n lin	ıux	with	wine
Posted by	yonki -	29 A	ug 201	4 11:10

I'm able to run DLR find on linux inside a Virtualbox WinXP emulator. However I'd prefer to run it in Wine (without having to launch/run the emulator & XP). It looks like it will work OK <u>*if* you have an iso of the original CD</u>.

I've been using the no CD patch ever since I first purchased it - the original CD is long gone. Does anyone out there have a CD or an iso they could point me to?

Thanks,
Fred (yonki@yahoo.com)

Technically the game is still being sold so it's not legal to host an iso. At least not for this site anyway.

I would suggest you look around the torrent sites. There is a good chance you might find one there. Or try to contact the person who posted that answer and see if they can send you one.
