Making the Warlords 1 download from this site work

Posted by A Small Cat - 26 Dec 2012 01:55

Do I need a DOS emulator to make the warlords 1 file from this site work? When I unzip the file none of the application files in the folder will run, they either do nothing or are not compatible with windows 7.

Any help is much appreciated.

Yes you need an emulator.

I recommend DOSBox. It's the easiest to configure and use.
