Warlords on Android

Posted by Adelphion - 29 Jan 2014 07:12

Hey is there a warlords app for android or at least a game that is a close copy that you guys know of? I was searching google play briefly and figured i'd ask you guys.

I hope u guys have good tips on how to get Warlords 3 DLR to work on windows xp or 7.

Adelphion,

DOSbox Turbo ($3.49)

play.google.com/store/apps/details?id=co...tix.dosbox&hl=en

This allows you to play old DOS based games. Warlords 2 is a DOS based game. I use DOSBox to play Warlords 2 on my Win XP machine. I haven't tried DOSBox Turbo on Android but the screen shots look identical to the PC version so I expect Warlords 2 would run just fine.

Warbarons (www.warbarons.com) is a free Warlords like clone that runs in your browser. Check it out on Chrome on your android.

KGB

P.S. DLR runs just fine on XP. I play there all the time with no problems. Windows 7 is a bit trickier so for that, there is a virtual machine available that just runs DLR under Win 2000. See the link below
