_____

Hello to all fans of Warlords! I`m glad to present you wargameproject, made by two persons, who are impressed by the Warlords universe. This is non commercial free project. Developers try to create the game that they'd like to play themselves. The developing continue, but despite this its fun to play already. The most interesting thing in the game is battle server, so you can play with friends or experienced strategists from all over the world. Im sure many of you have to taste yhis game)

You can see short review here:
