"in the meantime..."
Posted by Seppuccu - 02 Feb 2011 01:56

Just thought I'd re-post the link to my "mirror" of the old site until this one's fully functional again.

http://www.deondaltd.com/warlorders/

I believe the only thing that's still interesting there is the "Gaeme Stats" section which for W4 includes everything up to 1.05A patch and for DLR includes K4 heroes and Stormheim units.

Like I've said before this was only a work site so expect a number of dead links and missing pictures.

==========

Seppuccu,

Yes, we are almost ready to put the stats for DLR/War IV back on the new site.

Maybe in the next week or so. Are you more or less ready on your end for the War IV part?

KGB

P.S. Incidentally, I ran across a half dozen or so user created scenarios for W4 which I'll be adding to the downloads section. Never played any of them before and a few mention having custom events like the campaign maps do so I figure you'll be interested in trying those out.

Um...yeah, I guess so - if someone explains the hows and whats, that is. =)

Sounds cool with the scenarios, I'll definitely try them out.
