Thanks KGB and Anomander Rake, your commentary and feedback has been invaluable, and where I haven't listened to either of you, I've done so at my own peril.

I'm curious to see how many people, if any, will give this a try, but I've made it for my own enjoyment first and foremost.

But KGB, I'm forever grateful you've kept the fires burning for all those years!

Happy to serve the Warlords community.

Glad you finally are releasing something even if it's not perfect. You can always make some additions in the near future.

KGB
