Warlords 2 full screen

Posted by Haldain - 19 Jun 2012 10:59

Hi guys new to the boards. I have warlords2 running via dosbox in win7, but how do I get the game to go full screen instead of the little box. Any help would be welcomed. Great board to see these games still supported.

Haldain,

Alt-Enter is what does it in XP. I assume it's the same in Win 7.

haldain, if you want a break from the neverending display issues, come play warbarons at www.warbarons.com, its a great blend of the perfection that is War2 & DLR.

ok i promise not to threadhijack, just wanted to throw out there that there is a legit online alternative to hours of dosboxing!

KGB thanks for the info. Can't believe I I had forgotten that command. Nice to be playing it full screen again.
