How and Where can I PLAY THIS GAME ONLINE!

Posted by Cheidel - 17 Jul 2011 11:59

I've been addicted to DLR when i was a kid, and i saw this Warlords IV while looking for DLR. I obtain a copy and installed it but i can't play in Ubi.com it says wrong version of the client, while logging in to it using my Ubi.com account...

is there any gaming platform aside from ubi.com or maybe there's a way to play with that server?

Cheidel,

Which game are you talking about? DLR or Warlord IV?

If you mean DLR, BattleHQ has a room devoted to Warlords where you can go to find opponents (mostly busy on the weekends).

UBI.com no longer supports Warlords IV as it's 8 years old now so that's why you can't connect to their server. The only place I know to find Warlords IV online opponents is here. Basically post that you want to play and let everyone know when is a good time and what time zone you are located in. With luck, someone will answer and you can make plans to meet. But it will be direct IP play.

I'm talking about Warlords IV...I see...Thanks for the Info...maybe we can make a Gaming Platform for this...

hmmm i saw Game Ranger , it supports Warlords Series...
