

## DLR Statistics

Posted by Seppuccu - 14 Mar 2011 17:01

---

Work is moving on to the DLR pages and so I thought I'd open a new thread for that.

The other week we kind of decided we'd give the stats pages for the different games a similar look, so here are my suggestions for the DLR pages:

K4 Heroes: I suggest we make the headers grey and the tables black, and make the font bigger, just like the HOE and the DLR Units tables. See Wizard table at the bottom of the page.

Units: Regular units in black, Stormheim units in red (or blue).

And I think we should drop the black header pictures because they don't fit stylewise and because they serve no real purpose. On the Units page these pictures can be replaced by a single line:

"Regular units (by SSG) in black, Stormheim units (by Darwin) in red."

P.S. The links for the prior stats, and for the k4stats.doc for the K-Heroes is dead. Should I remove the link or should we recreate the page (I have the previous stats on my "mirror" but not the k4stats.doc)?

=====
