

Warlords 2 Deluxe on WinXP

Posted by Vissavald - 06 Jan 2017 08:56

Is it possible to run W2 Deluxe on WinXP right away, not using DOSBox? It seems I've read something somewhere that someone has managed to do it. Wargul16, maybe? 

I have W2 Deluxe ISO v.2.2.2 and I can't install the game. The small distributive that Warlords offer also refuses to run with any possible compatibility options. In both cases I get identical error messages, something about memory IIRC.

Thanks for your help, I've managed to get the sound working!
