

Warlords 3 colors problems under XP

Posted by GuyD - 26 Nov 2011 03:29

Hi ,

I installed the DLR on Windows XP (SP3).

updated to 1.02 (UK) Version.

added the -WINCURSOR option at the shortcut target.

when the game starts everything look fine, but after a few seconds the game
colors are changes to something look like CGA graphics.

if i resign and return to the main menu the colors are fixed but again after few seconds its again ruined.

I tried to change my display settings and run the game in compatibility mode with no success.

Ill appreciate help.

Thanks,

GuyD

This solved it.

www.warlords.com/warlords3-dlr/technic...in-a-virtual-machine

works great under xp & windows7
